How to start your pooch on

# SIMPARICA Trio

**Welcome to the SIMPARICA Trio club!**

Here's your "simple, sorted, no-fuss protection" routine:

Make sure your dog has completed their previous parasite treatment before starting Simparica Trio. Use the next scheduled dose date from the previous product as your guide

Give 1 chew by mouth once monthly, using the correct weight-range product for your pooch

Give it with or without food – just make sure the full chew is swallowed (yum!)

Stay on schedule by picking the same date each month and setting a reminder

Help reduce exposure and re-infection—always pick up and dispose of dog poop

**Convenient, effective and yum!**

# Why Simparica TRIO?

**Simplify treatment** by using a single, monthly, broad-spectrum parasiticide tablet that:

- ✓ Kills ticks
- ✓ Kills fleas within 8 hours, for 5 weeks
- ✓ Kills fleas before they lay their eggs thereby stopping the flea lifecycle
- ✓ Kills adult and immature roundworms
- ✓ Kills adult and immature hookworms

For the prevention of **heartworm disease**

Effective against both mature and immature stages of roundworm and hookworm

Covers a **wide weight range** – Simparica TRIO is suitable for dogs from **1,25 kg to 60+ kg**

Can be administered in conjunction with other veterinary medicines

Can be given to **puppies from 8** weeks old

**Simparica TRIO**
*(sarolaner, moxidectin, and pyrantel chewable tablets)*
